PROFESSIONAL SUMMARY

Aspiring B.Tech Computer Science (AI) student with hands-on basic experience in full-stack web development and data science. Passionate about leveraging machine learning, artificial intelligence, and data analytics to build intelligent systems. Proficient in Python, SQL, and modern ML frameworks, with a strong foundation in statistical modeling and predictive analytics.

EDUCATION

Motihari College of Engineering

Bachelor of Technology – Computer Science & Engineering (AI)

Motihari, Bihar, India

Nov 2022 – May 2026

- Specialization in Artificial Intelligence and Machine Learning
- Relevant Coursework: Data Structures, Machine Learning, Deep Learning, Database Management, Computer Vision, Natural Language Processing

EXPERIENCE

Axcentra

Data Science Intern

Remote

Jan 2026 – Feb 2026

- Worked on data analysis and visualization tasks using Python and SQL
- Assisted in building and evaluating machine learning models for business insights
- Performed data cleaning, preprocessing, and exploratory data analysis (EDA) on real-world datasets

RCPL – Ritusha Consultants Pvt. Ltd.

Full Stack Web Developer

India

Nov 2023 – Feb 2024

- Developed and maintained web applications using HTML, CSS, JavaScript, Bootstrap, PHP, and MySQL
- Built dynamic, responsive user interfaces and integrated back-end APIs
- Collaborated with team members to deliver client-ready projects within deadlines

PROJECTS

Smart College Analytics and Prediction System | Python, ML, SQL, Flask, Pandas

2026

- Designed and developed an end-to-end analytics platform to monitor and predict student academic performance
- Applied regression and classification algorithms (Random Forest, Logistic Regression) to forecast student outcomes with 87% accuracy
- Built interactive dashboards using Matplotlib and Seaborn to visualize attendance, grades, and performance trends
- Integrated a Flask-based REST API backend with a MySQL database for real-time data ingestion and querying

Disease Prediction System using Machine Learning | Python, Scikit-learn, Flask, Streamlit

2025

- Built a multi-disease prediction web application capable of predicting diabetes, heart disease, and liver conditions
- Trained and compared multiple ML models (SVM, Decision Tree, Gradient Boosting) achieving over 91% accuracy on benchmark datasets
- Implemented feature engineering, SMOTE for class imbalance handling, and cross-validation for robust model evaluation
- Deployed the model via a Streamlit web interface allowing users to input symptoms and receive real-time predictions

TECHNICAL SKILLS

Programming Languages: Python, SQL, JavaScript, PHP, HTML/CSS

Machine Learning & AI: Supervised & Unsupervised Learning, Neural Networks, NLP, Computer Vision, Feature Engineering, Model Evaluation & Tuning

ML Frameworks & Libraries: Scikit-learn, TensorFlow, Keras, PyTorch, XGBoost, LightGBM, OpenCV

Data Science & Analytics: Pandas, NumPy, Matplotlib, Seaborn, Plotly, Statistical Analysis, EDA, Data Wrangling

Databases: MySQL, PostgreSQL, SQLite

Tools & Platforms: Google Analytics, Jupyter Notebook, VS Code, Git & GitHub, Google Colab, Power BI

Web Development: Flask, Bootstrap, REST APIs, PHP

Other: Data Visualization, Predictive Modeling, ETL Pipelines, A/B Testing, Big Data Fundamentals

CERTIFICATIONS

Google Data Analytics Professional Certificate <i>Google / Coursera</i>	2024
- Completed 8-course program covering data analysis, data visualization, SQL, R programming, and Tableau - Gained hands-on experience with real-world datasets, spreadsheets, and business case studies	
Salesforce Certified Platform Developer <i>Salesforce</i>	2024
Demonstrated ability to build and deploy custom Salesforce applications and automate business workflows	
Cisco Certified CyberOps Associate <i>Cisco Networking Academy</i>	2023
- Completed Cisco's cybersecurity curriculum covering network security, threat detection, incident response, and security operations - Acquired knowledge of SOC workflows, cryptography fundamentals, and secure network protocols
