

# HEMANT SHAHI

Nawada, Bihar, India

+91-8298180570   shahimce@gmail.com   linkedin.com/in/hemantshahi   hemantshahi.github.io

## Professional Summary

Results-driven Data Analytics professional with expertise in SQL, Power BI, and Python. Proven track record of delivering data-driven insights through multiple internships and projects. Specialized in business intelligence, predictive analytics, and dashboard development. Proficient in leveraging machine learning algorithms and statistical analysis to solve complex business problems. Strong foundation in cloud technologies including OCI and generative AI applications.

## Technical Skills

**Programming Languages:** Python, Java, SQL

**Data Analytics & BI Tools:** Power BI, Excel (Advanced), Pandas, NumPy, Matplotlib, Seaborn

**Database Management:** MySQL, SQL Server

**Machine Learning:** Scikit-learn, TensorFlow, Statistical Analysis, Predictive Modeling, Classification, Regression

**Cloud & Platforms:** Oracle Cloud Infrastructure (OCI), Exploring D365 CE, Power Platform

**Development Tools:** Git, Jupyter Notebook, VS Code, Google Colab, ETL Processes

**Core Competencies:** Data Cleaning, Data Visualization, Statistical Analysis, Business Intelligence, Dashboard Design

## Professional Experience

### Data Science Intern

December 2025 – January 2026

SARV Infotech Private Limited

Muzaffarpur, Bihar

- Developed and implemented data-driven solutions using Python and machine learning algorithms to optimize business processes and improve decision-making efficiency by 25%
- Designed and deployed interactive dashboards using Power BI, enabling real-time monitoring of key performance indicators (KPIs) and facilitating data-driven strategic planning
- Conducted comprehensive exploratory data analysis (EDA) on large datasets (1000+ records), identifying critical trends and patterns that informed business intelligence strategies
- Collaborated with cross-functional teams to gather requirements, translate business needs into technical specifications, and deliver actionable insights through statistical analysis and predictive modeling
- Automated data extraction, transformation, and loading (ETL) processes, reducing manual effort by 40% and improving data quality and consistency across multiple systems

### Summer Intern - Data Analytics

May 2025 – June 2025

National Institute of Electronics & Information Technology (NIELIT)

Buxar, Bihar

- Executed end-to-end data analytics projects involving data collection, preprocessing, analysis, and visualization using Python libraries (Pandas, NumPy, Matplotlib)
- Developed SQL queries for database management and performed complex joins, aggregations, and subqueries to extract meaningful insights from relational databases
- Created comprehensive analytical reports and presentations for stakeholders, effectively communicating technical findings to non-technical audiences
- Implemented data quality assurance procedures and validation techniques, ensuring accuracy and reliability of analytical outputs
- Gained hands-on experience with government IT infrastructure and digital transformation initiatives

### Internship Trainee - AI & Data Science

September 2023 – May 2024

IIT Kharagpur AI4ICPS I Hub Foundation

Remote

- Participated in intensive training program focused on artificial intelligence, machine learning, and data science applications for Industry 4.0 and Cyber-Physical Systems
- Implemented deep learning algorithms including neural networks for image classification and natural language processing applications
- Conducted research on AI applications in industrial automation and contributed to technical documentation and research papers
- Collaborated on team projects utilizing agile methodologies and version control systems (Git) for efficient project management

Projects

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |             |

| <i>Bachelor of Technology in Computer Science &amp; Engineering-AI</i> | <i>CGPA: 7.8/10.0</i>           |

Certifications

- IIT Kharagpur AI4ICPS:** Certification in Artificial Intelligence & Cyber-Physical Systems
- Oracle Cloud Infrastructure (OCI):** OCI Generative AI Professional Certification
- Google:** 5-Day AI Agents Intensive Course - Advanced AI Agent Development
- Cisco:** Data Analytics Essentials - Foundations of Data Analysis
- Forage:** Deloitte Australia - Data Analytics Job Simulation
- Industry Training:** Certificate of Participation in Level 1.1: E-Commerce Analytics
